Quality Control of Insulins and Biosimilar Insulins: What Do We Know? 811
Alan W. Carter, PharmD, Lutz Heinemann, PhD, and David C. Klonoff, MD, FACP, FRCP (Edin), Fellow AIMBE

Special Section: Psychological Factors for Diabetes Technology, Part II

Guest Editors: Katherine Barnard, Jill Weissberg-Benchell, Michael Harris, and Kimberly Driscoll

Videoconferencing for Teens With Diabetes: Family Matters 816
Danny C. Duke, PhD, David V. Wagner, PhD, Jenae Ulrich, PsyD, Kurt A. Freeman, PhD, and Michael A. Harris, PhD

Impact of Type 1 Diabetes Technology on Family Members/Significant Others of People With Diabetes 824
Katharine Barnard, PhD, Vincent Crabtree, PhD, Peter Adolfsson, MD, Melanie Davies, MB, ChB, MD, David Kerr, MD, Amy Kraus, BS, Danielle Gianferante, PhD, Elizabeth Bevilacqua, MBA, and George Serbedzija, PhD

Texting Adolescents in Repeat DKA and Their Caregivers 831
David V. Wagner, PhD, Samantha Barry, MA, Lena Teplitsky, MPH, Annan Sheffield, BS, Maggie Stoeckel, PhD, Jimmie D. Ogden, BS, Elizabeth Karkula, MEd, Alexandra Hartman, BA, Danny C. Duke, PhD, Kim Spiro, PhD, and Michael A. Harris, PhD

Psychosocial Impact of the Bionic Pancreas During Summer Camp 840
Jill Weissberg-Benchell, PhD, CDE, Danielle Hessell, PhD, William H. Polansky, PhD, CDE, and Lawrence Fisher, PhD

Depressive Symptoms, Emotion Dysregulation, and Bulimic Symptoms in Youth With Type 1 Diabetes: Varying Interactions at Diagnosis and During Transition to Insulin Pump Therapy 845
Deborah L. Young-Hyman, PhD, Claire M. Peterson, PhD, Sarah Fischer, PhD, Jessica T. Markowitz, PhD, Andrew B. Muir, MD, and Lori M. Laffel, MD, MPH

Diabetes Technology: Uptake, Outcomes, Barriers, and the Intersection With Distress 852
Diana Naranjo, PhD, Molly L. Tanenbaum, PhD, Esti Iturralde, PhD, and Korey K. Holod, PhD

Psychosocial Aspects of Continuous Glucose Monitoring: Connecting to the Patients’ Experience 859
Thomas Kubiak, PhD, Caroline G. Mann, MSc, Katherine C. Barnard, PhD, and Lutz Heinemann, PhD

Original Articles

A New Method to Assess Asymmetry in Fingerprints Could Be Used as an Early Indicator of Type 2 Diabetes Mellitus 864
Molly R. Morris, PhD, Bjoern Ch. Ludwar, PhD, Evan Swingle, Mahelet N. Mamo, and Jay H. Shubrook, DO

Fundamental Importance of Reference Glucose Analyzer Accuracy for Evaluating the Performance of Blood Glucose Monitoring Systems (BGMSs) 872
Timothy S. Bailey, MD, FACE, CPI, Leslie J. Klaff, MD, PhD, Jane F. Wallace, BA, CCRA, Carmine Greene, MS, CCRA, Scott Pardo, PhD, PStat, Bern Harrison, BA, and David A. Simmons, MD

Assessing the Accuracy of Continuous Glucose Monitoring (CGM) Calibrated With Capillary Values Using Capillary or Venous Glucose Levels as a Reference 876
Meri Andelin, RN, BSc, Jort Krapff, MD, Viktorija Matuleviciene, MD, Jeffrey I. Joseph, DO, Stig Attvall, MD, PhD, Elvar Theodorsson, MD, PhD, Irl B. Hirsch, MD, Henrik Imberg, BSc, Sofia Dahlqvist, David Klonoff, MD, Boie Haraldsson, MD, J. Hans DeVries, MD, and Marcus Lind, MD, PhD

Glucose Variability: Comparison of Different Indices During Continuous Glucose Monitoring in Diabetic Patients 885
Jean-Pierre Le Floch, MD and Laurence Kessler, MD, PhD

The Impact of Real-Time Continuous Glucose Monitoring in Patients 65 Years and Older 892
William H. Polansky, PhD, Anne L. Peters, MD, and Danielle Hessell, PhD

The Cost-Effectiveness of Real-Time Continuous Glucose Monitoring (RT-CGM) in Type 2 Diabetes 898
Stephanie J. Fonda, PhD, Claudia Graham, PhD, Julie Munakata, MS, Julia M. Powers, MHS, David Price, MD, and Robert A. Vigersky, MD

The Potential Cost Implications of Averting Severe Hypoglycemic Events Requiring Hospitalization in High-Risk Adults With Type 1 Diabetes Using Real-Time Continuous Glucose Monitoring 905
Amy Bronstone, PhD and Claudia Graham, PhD, MPH

Injection Technique and Pen Needle Design Affect Leakage From Skin After Subcutaneous Injections 914
Kezia Ann Praestmark, MSc, Bente Stallknecht, MD, PhD, DMSc, Morten Lind Jensen, MD, PhD, Thomas Sparre, MD, PhD, Nils Berg Madsen, PhD, and Jonas Kildegaard, PhD
Attributes Influencing Insulin Pen Preference Among Caregivers and Patients With Diabetes Who Require Greater Than 20 Units of Mealtime Insulin
Tao Wang, PhD, Kenneth A. Conrad, MS, Kate van Brunt, MSc, and Tina M. Rees, PhD

Transition From Intravenous to Subcutaneous Insulin in Critically Ill Adults
Meagan K. Doolin, PharmD, BCPS, Todd A. Walrath, PharmD, BCPS, BCCCP, Serena A. Harris, PharmD, BCPS, BCCCP, Jessica A. Whitten, PharmD, BCPS, BCCCP, and Andrew C. Fritschle-Hilliard, PharmD, BCPS, BCCCP

Technology Reports
Performance of a Blood Glucose Monitoring System in a Point-of-Care Setting
Cornelia Ottiger, PhD, Nicole Gygli, BA, Andreas R. Huber, MD, Beatriz Fernandez-Tresguerres, PhD, Scott Pardo, PhD, and Thorsten Petruschke, MD

Requirements for Successful Adoption of a Glucose Measurement System Into a Hospital POC Program
Anna K. Füzéry, PhD, DABCC, FCACB, FACB and George S. Cembrowski, MD, PhD, FCAP, FABP

Review Articles
AP@home: The Artificial Pancreas Is Now at Home
Lutz Heinemann, PhD, Carsten Benesch, PhD, and J. Hans DeVries, MD, on Behalf of the AP@home Consortium

Pen Devices for Insulin Self-Administration Compared With Needles and Vial: Systematic Review of the Literature and Meta-Analysis
Pieraleasandra Lasalvia, Julián Esteban Barahona-Correa, Diana Marcela Romero-Alvernia, Sebastián Gil-Tamayo, Camilo Castañeda-Cardona, MD, Juan Gabriel Bayona, Juan José Triana, Andrés Felipe Laserna, Miguel Mejía-Torres, Paula Restrepo-Jimenez, Juliana Jimenez-Zapata, and Diego Rosselli, MD

Improving the Glucose Meter Error Grid With the Taguchi Loss Function
Jan S. Krouwer, PhD

Obesity Technology
Polytetrafluoroethylene Ingestion as a Way to Increase Food Volume and Hence Satiety Without Increasing Calorie Content
Rotem Naftalovich, MD, MBA, Daniel Naftalovich, BS, and Frank L. Greenway, MD

Commentaries
Unknown Safety and Efficacy of Smartphone Bolus Calculator Apps Puts Patients at Risk for Severe Adverse Outcomes
Irl B. Hirsch, MD and Christopher G. Parkin, MS

Recurrent Endocrine Cycles
James M. Minor, PhD, Leslie M. Rickey, MD, MPH, and Richard M. Bergenstal, MD

Letters to the Editor
A Mobile Application Guiding Patients With Type 1 Diabetes Using Sensor-Augmented Insulin Pump Therapy
Annabelle Esvant, MD, Marie-Anne Lefebvre, PhD, Boris Campillo-Gimenez, MD, Morgane Lannes, MD, Denis Delamarre, Btech, Isabelle Guilmot, MD, and Jean-Yves Poitré, MD

Longer Usage Time for CSII Catheters: An Underestimated Challenge
Andreas Pfützner, MD, PhD, Daniela Sachsenheimer, MD, and Marco Grenningloh, PhD

CSII: Longer Catheter Usage Time, a Reasonable Goal
Jean-Luc Ardilouze, MD, PhD, Julie Ménard, PhD, Fernand Gobeil Jr, PhD, Maude Gagnon-Augier, PhD, Ghislaine Houde, MD, Marie-Hélène Pesant, MD, Rémi Rabasa-Lhoret, MD, PhD, and Jean-Patrice Baillargeon, MD, MSc

Salivary Glucose as a Diagnostic Marker for Diabetes Mellitus
Komal Smriti, BDS, MDS, Keerthilatha M. Pai, BDS, MDS, Vineetha Ravindranath, BDS, MDS, Srikanth Gadicherla, BDS, MDS, and Kalyana Chakravarthy Pentapati, BDS, MDS

Challenges Associated With Exercise Studies in Type 1 Diabetes
Sheri R. Colberg, PhD, Wendy C. Bevier, PhD, Jordan E. Pinsker, MD, Joon Bok Lee, BS, Brigid Ehrlich, BS, Eyal Dassau, PhD, Francis J. Doyle III, PhD, Kong Y. Chen, PhD, and David Kerr, MD

Accuracy of a Blood Glucose Monitoring System
Grace E. Vanterpool, MBE

Increased Usage of Insulin Pump Functions Not Associated With Improved HbA1c in Children and Adolescents With Type 1 Diabetes Mellitus
Hanna Sandberg, MD, Peter Anderberg, MS, PhD, Henrik Forssell, MD, PhD, Ingvar Ovhed, MD, PhD, and Johan Berglund, MD, PhD
